

## Women Demand More Personal OB/GYN Care

Over the last twenty years, for many reasons, Ob/Gyn care has evolved into high volume multi-provider practices. Women feel as though they are just a number, instead of a unique patient who deserves individual care and attention. This void in the Ob/Gyn community has left women yearning for a more personal connection to their provider. Going to the Ob/Gyn is often a vulnerable experience, but having a provider who knows you and your needs is a critical necessity that has been overlooked for far too long.

Our team is comprised of award winning, experienced and compassionate providers. As the area's only Board Certified husband and wife Ob/Gyn team, we are able to provide our patients with a special understanding of their health-care needs. Our philosophy is to provide exceptional medical care, but just as importantly, to consistently provide open communication, up-to-date education, and individual compassion for our patients. Dr. John and Dr. Ingrid Reyes offer a very unique husband and wife approach to Ob/Gyn, which facilitates life-long patient relationships. Our Nationally Certified Physician Assistant Michelle Forrester was hand-picked for her exemplary academic achievements, years of experience and similar philosophy regarding the importance of personal patient care. Her caring approach and friendly demeanor allow her to connect with all ages, and she has a special interest in adolescent care and first time Gynecologic visits.

Why are we called Modern Ob/Gyn? Because we are in fact modern! We offer in-office surgical procedures, such as sterilization and uterine ablation, which allows our patients to bypass more invasive and costly procedures. Our unique training also allows our patients to benefit from the most sophisticated advanced laparoscopic and robotic minimally-invasive surgeries resulting in hidden scars and a shorter recovery time.

Here at Modern Ob/Gyn we have seen this need and are determined to provide this type of personal care to the women here in the greater Atlanta area. We offer a patient-centered approach with open dialogue to help our patients make the best decisions regarding their medical care. Our willingness and ability to listen to our Obstetric patients allows us to guide moms through pregnancy and labor, while taking into consideration individual opinions and concerns. We are proud to say that here at Modern Ob/Gyn we are going against the trend and are here to offer you a more personal experience.

We also provide routine and advanced gynecologic care including annual exams, management of Pap smears, HPV testing, irregular cycles, menopause and other common women's issues. We would love to make you a part of our patient family, so please come by and let us show you what we have to offer. For more information please visit our website [www.reyesobgyn.com](http://www.reyesobgyn.com). We are newly located at 10692 Medlock Bridge Road Suite 100-A Johns Creek, GA 30097. 404-446-2496 (44-OBGYN)
